Anh Kiệt Lưu Trần

Backend Developer

Have 4 years of experience in developing and maintaining application. Seeking a position where I can leverage my expertise in designing and implemented server-side applications and services using established development frameworks and tools. I'm not a talented programmer, but always highly enthused about my work and tasks ahead.

EDUCATION

HCM University Of Science
Bachelor's degree in Information Technology
08/2014 - 07/2020   *Mode of study: Full-time*

WORK EXPERIENCE

Software developer
Fujinet System
06/2018 - 06/2022   *Ho Chi Minh city*
Joining R&D team as a software developer. Worked with a range of technologies and framework such as Python, Javascript, Django,...

Detail of Tasks:
- Built secure, robust, and dependable web applications using the Django web framework .
- Created the user interface of a website or web application. Modified layouts, appearance, and functionality of web pages. Handled compositions, colors and typography. Have knowledge about data visualization.
- Selected, implemented and evaluated appropriate machine learning models using frameworks and libraries such as TensorFlow, PyTorch,...
- Pre-processed, cleaned and transformed the data to make it ready for machine learning models.
- Researched and implemented AI technologies: OCR, NLP, Computer Vision.
- Wrote APIs: Identified the purpose and scope, defined the data model and endpoints, developed and tested.

Backend developer
Lecle Vietnam
07/2022 - Present   *Ho Chi Minh city*
Collaborated with designer, frontend developer and other stakeholders to design and develop applications, fix issue from user and make new feature.

Detail of Tasks:
- Used the Odoo framework to develop and maintain an ERP web application based on design.
- Upgrade the current company ERP system (from v12 to v16) by upgrading modules and migrating databases.
- Supported the product team in designing, developing, and testing RESTful APIs (using Golang).
- Checked end-user feedback to find the cause of the issue, pre-procedured and fixed it.
- Implemented OAuth2 for authorization to login to other applications by ERP token.

SKILLS

Python   Odoo   Golang   Django   Javascript

Docker   SQL

PROJECTS

Fujinet AI Services(aiservice.fujinet.net) (06/2019 - 04/2022)
- Used OCR to extract text from CV, invoice.
- Used machine vision to detect users, recognize users, predict emotions and genders, and estimate ages.
- Analyzed and regenerated images.

Lecle Cloud(devera.cloud) (11/2022)
- Used Odoo(backend Python, javascript webclient, Postgres DB).
- Introduced products and allows users to buy or trial them.
- Changed signup flow(passwordless, verify email, check information).
- Customized Odoo Website theme to improve end-user experience.

Lecle Meet (08/2022 - 01/2023)
- Backend using Golang and base on Mattermost.
- A workspace for teams to collaborate securely and effectively.
- Users can create new channels, book a meeting, submit an absence, track events with a timetable,...
- Customized team messaging, integrated ERP and Gitlab.

QUALITIES

Soft skill
Experience on teamwork environment, self management, writing skill. Research

Research
Data collection, finding solution in various sources(paper, community,..)

Learn new technology
Improve technical skills by learning new programming language, framework, platform,...

ADDITIONAL SKILLS

RDBMS(PostgreSQL, MySQL)
Professional Working Proficiency

English
Limited Working Proficiency

Interface design tool(Figma, Excel,...)
Full Professional Proficiency

Version control(Git, SVN)
Full Professional Proficiency

Agile Methodology
Full Professional Proficiency

Office
Full Professional Proficiency

Machine learning
Professional Working Proficiency
